09936016389

SUMMARY

Computer Engineering student with foundational experience in programming, embedded systems, and hardware-software integration. Proven ability to manage tasks efficiently and maintain attention to detail. Motivated to continuously develop technical skills and contribute effectively to collaborative projects and real-world engineering challenges.

EDUCATION

Bachelor of Science in Computer Engineering
Cagayan State University — Tuguegarao City, Philippines

TECHNICAL SKILLS

- **Tools and Applications:** Microsoft Excel, Microsoft Access, Canva, Arduino IDE
- **Programming Knowledge:** Introductory Python (with exposure to data libraries such as Pandas and NumPy), basic C++
- **Hardware Skills:** Arduino setup and programming, simple circuit building, sensor-based systems

ACADEMIC PROJECTS

- **Student Information Management System**
  - Designed and developed a structured system to manage student records, including personal data, grades, and attendance
  - Implemented basic database principles to ensure organized and efficient data storage and retrieval
  - Improved data handling accuracy and reduced manual record-keeping processes
- **Simple Grade Calculator System**
  - Built a program that computes student grades based on input scores and grading criteria
  - Reduced manual computation errors by automating the grading process
  - Strengthened understanding of basic programming and logical operations
